

# Functional Capacity Evaluations

Core Physical Therapy | Evansville, WI

*Objective. Defensible. Efficient*

## What We Provide

Comprehensive, standardized Functional Capacity Evaluations performed by trained, licensed physical therapists.

Our 4–6 hour evaluations objectively measure an individual’s ability to perform work-related physical demands including lifting, carrying, positional tolerances, and fine motor tasks.

## Our Reports Include

- Objective strength and physical capacity measurements
- Consistency of effort and validity indicators
- Work-level classification (Sedentary through Very Heavy)
- Comparison to job-specific physical demands when provided
- Clear recommendations for return-to-work, restrictions, or accommodations

## Ideal For

- Workers’ compensation return-to-work decisions
- Disability determination and settlement support
- Personal injury litigation requiring objective capacity data
- Pre-employment and post-offer physical capacity screening
- Job accommodation and placement planning

Include the individual’s name, referral source, reason for evaluation, and any relevant job descriptions or medical records. We’ll handle scheduling and keep you updated.
