

# Musculoskeletal Diagnostic Ultrasound

Core Physical Therapy | Evansville, WI

*See it. Treat it. Track it.*

## What We Offer

---

In-house diagnostic musculoskeletal ultrasound performed by trained, licensed physical therapists. Real-time imaging of soft tissue structures during your patient's visit — no separate imaging appointment needed.

## Clinical Applications

---

- Rotator cuff tears and tendinopathy
- Epicondylitis (tennis/golfer's elbow)
- Achilles and patellar tendon injuries
- Plantar fasciitis
- Muscle strains, joint effusions, bursitis
- Nerve entrapments (carpal tunnel, cubital tunnel)

## What Referring Providers Receive

---

- Ultrasound images with clinical correlation in progress notes
- Direct communication when findings suggest advanced imaging or specialist referral
- Detailed documentation supporting your clinical decision-making
- Referral pathways to orthopedic surgery, regenerative medicine, or MRI when indicated
